SUBJECT INDEX

Acoustic neuromas, Suboccipital removal of	406
Audiometry, Sound localization with phase	291
Auditory nerve responses recorded from the ear canal, Clinical application of	283
Auditory ossicles of the dog, A topographic quantitative analysis of the post-natal bone formation in the	16
Bell's paralysis, Ultrastructural investigations on the degenerative and regenerative processes in chorda tympani in	304
Cochlea, Damage to Reissner's membrane in the guinea-pig, following acute atoxyl intoxication	415
Cochléaire, Une explication biochimique et cytologique de l'otospongiose	200
Cochlear blood flow, Neural control of	26
Cochlear fluids, Aminotransferases in post-mortem	66
Cochlear nuclei in monkeys after dihydrostreptomycin or noise exposure, The	344
Corti, Acetylcholinesterase activity in the chinchilla organ of, in normal and acoustically overstimulated animals	48
Corti, Fracture faces of the junctional complexes in the reticular membrane of the organ of	36
Corti, The role of thyroxine in the differentiation of the organ of	429
Corti's ganglion, Effects of acoustic trauma on	270
Deafness, Physiological and clinical aspects of the rehabilitation of total, by implantation of multiple intracochlear electrodes	436
Eighth nerve, Regeneration in the	228
Eye movements in the rabbit, A reexamination of "neck reflex"	386
Facial clefts, Skulls with	249
Facial nerve palsy, Postauricular (12 msec latency) responses to acoustic stimuli in patients with peripheral	264
Facial nerve, Studies on the anatomy of the	173
Facial palsy, Acute	462
Fistulae and cysts, The use of quick-hardening polymers in the surgical treatment of congenital neck	150
Hearing loss and cochlear pathology in monkeys after noise exposure	337

Hearing loss, Social handicap among workers with noise-induced	260
Inner ear, Effect of phlorizin on glucose transport in the	424
Labyrinthine capsule, Further contribution in the densitometric study of the, with special reference to the bottom of the internal auditory meatus	257
Laryngeal cancer, Morphological observations of immunobiology of	353
Larynx, A long-term comparative study of the mammalian, based on whole organ serial sectioning	167
Maxillary sinus, Elimination of contrast medium from the	468
Maxillary sinusitis, The antibacterial effect of antibiotics in treatment of	475
Medial geniculate body in unanesthetized cats, Size and duration of inhibition in the	102
Medial geniculate units, Activity of single, in response to single and double clicks	91
Meniere's disease, Advanced	113
Meniere's disease, Ultrasound treatment of	120
Middle ear, Pressure-dependent variation in volume of mucosal lining of the	442
Middle ear transmission losses caused by tympanic membrane perforations in cats	330
Mittelohrschleimhaut, Reaktionsformen der	178
Motion sickness, Postural behaviour and	237
Nystagmus, The effect of eye closure upon the pathological vestibular spontaneous	376
Nystagmus threshold in turning test in different age groups and in patients suffering from otosclerosis, The	127
Ossicular substitute, Dentine as an	450
Ostial patency tests, Technical variations in clinical	244
Otitis media, Histopathological alterations of the mucosal folds in chronic	197
Otitis media, Secretory	204
Otosklerose, Veränderungen im Bereich der Mittelohrschleimhaut bei der	185
Papilla, Toxic effects of gentamicin on the basilar, in the lizard <i>Calotes versicolor</i>	57
Parotisspeichel und ihre Probleme, Enzymdiagnostik im menschlichen	315
Pectoral flap, Retraction of the delto-	161
Perilymph, Measurement of oxygen tension in human	278
Perilymphe, Elektrophoretische Untersuchungen zur Proteinverteilung in der Meer-schweinchen-	68
Petrosal nerve, Deviations in the route of the greater, for the needs of "videctomy"	503
Radiosialometry. Part I	130
Radiosialometry. Part II	141
Rhinitis, The role of psychic factors in patients with allergic	484
Sacculles and the vertical semicircular canals, Interaction between the	83
Salivary gland tumours, A cytochemical method of grading the malignancy of, pre-operatively	489
Semicircular canals of the frog, The origin of slow potentials in	395
Stapedius muscle contraction, Eardrum displacement following	1
Stapes, Scanning electron microscopic studies of the, in normal and in some pathological and experimental conditions	220
Submaxillary glands of rats, The influence of guanazone on the	507
Swallowing in the fixed larynx, Act of	323
Taste buds, Ultrastructural study of, at rest and after stimulation, and comparative study between type III cell and Merkel cells	209
Tongue of man and monkey, Scanning electron microscopy of fungiform papillae on the	496
Tonsillectomy and adenectomy, Bacteremia after	242
Tympanoplasty, Uptake and release of alcohol by homograft tissues in	300
Vestibular evoked potentials in thalamus and basal ganglia of the squirrel monkey	73
Vestibulo-ocular reflex, Voluntary, non-visual control of the human	365
